ABOUT ME

Ambitious and tech-enthusiast BI Analyst with a Master's in Computer Science. Proficient in Python and SQL for data-driven problem-solving, I enjoy taking ownership of the technical solutions and data insights for projects from conceptualisation through implementation. I'm recognised for strategic and creative thinking, with a passion for driving digital innovation within international teams.

WORK EXPERIENCE

ING Nederland B.V.

Amsterdam, Netherlands

AI Engineer Intern

Apr 2024 – Nov 2024

- **Collaborated** with a diverse team of international professionals to design and implement an AI Proof of Concept (POC).
- Developed two AI and Machine Learning models (Isolation Forest, Autoencoders), and executed a robust Exploratory Data Analysis (EDA) using **Python** and **SQL** for future deployment readiness.
- **Translated complex technical findings into business recommendations** for senior stakeholders (CIOs), demonstrating pitch delivery skills. Collaborated with international professionals.
- Enhanced the credit risk data quality process, reducing the manual effort by **99%** from several days to less than 1 minute. **The POC has been implemented inside ING after its completion.**

Victory Square Partners

Timisoara, Romania

Android Developer Intern

Jul 2021 – Sept 2021

- Implemented **Firebase Analytics** for data-driven feature optimisation and decision-making.
- Supported **Agile Scrum** sprints, contributing to scalable mobile application development using MVVM architecture.
- Improved UI/UX across 50% of the app's key screens, enhancing user satisfaction and engagement.
- Collaborated cross-functionally to align design, product, and technical priorities under tight deadlines in a **product-oriented environment**.

REMARKABLE PROJECTS

Improving Code Review in Financial Institutions

Enschede, Netherlands

Process Automation Analyst

Sept 2023 – Feb 2024

- Facilitated **stakeholder collaboration** to define the project scope and gathered functional requirements via **survey creation**, identifying key bottlenecks in the existing manual code review process.
- Designed **Azure DevOps** pipelines and managed task tracking to ensure transparency and workflow optimisation in a 4-person team.
- Integrated an AI-based (LLM) component using Python for ING's platform, validating feasibility for enterprise use by **facilitating** weekly stakeholder meetings.
- Successfully **automated** a manual process with a consistent feedback loop (execution time under 1 minute).

Business Intelligence & Data Visualization Project

Enschede, Netherlands

Academic Project (University of Twente)

Feb 2023 – Apr 2023

- Designed a Star Schema (Snowflake) and executed **ETL processes** using **Python** to prepare data for analysis, aligning with **Data Warehousing principles**.
- Developed interactive dashboards using **Matplotlib** and **Plotly**, visualising KPIs like Profit Margin and Regional Sales to drive strategic decisions.
- Applied the **Balanced Scorecard (BSC)** framework to formulate business questions and derive actionable recommendations (e.g., optimising supply chain in Japan).
- Demonstrated strong **SQL/Database** modelling skills by structuring complex datasets into Fact and Dimension tables.

SKILLS

Business Analysis & Product: Requirements Analysis & Prioritization (MoSCoW), Process Modeling (BPMN 2.0), User Story Mapping, MVP Definition, Benefits Analysis, Workshop Facilitation.

Technical Stack & Tools: **Programming:** Python, SQL (PostgreSQL), React.js. **Tools:** Azure DevOps (Boards, Pipelines), GIT, Firebase, High proficiency in Microsoft Excel, Word, and PowerPoint.

Data & Automation: Data Analysis (EDA), Machine Learning (LLMs, Anomaly Detection), Process Automation, Proof-of-Concept Development.

Soft Skills & Leadership: Stakeholder Management, Conflict Resolution, Cross-Functional Team Mediation, Communicative (C1 English), Critical Thinking, Attention to Detail, Task Management.

EDUCATION

Master's in Computer Science

University of Twente

Enschede, Netherlands

Graduated in March 2025

Courses: Software Engineering Techniques, Software Management, Requirement Elicitation, Microservices Architecture in Web Development, Machine Learning, Exploratory Data Analysis.

Bachelor's in Computer Science

West University of Timisoara

Timisoara, Romania

2019–2022

Courses: Algorithms and Data Structures, Introduction to Python, Software Engineering, Statistics and Numerical Analysis, Web Technologies, Artificial Intelligence, Object-Oriented Programming

Erasmus+ Semester – Bachelor of Game and Apps Development

IADE Creative University

Lisbon, Portugal

2020–2021

Courses: Collaborative Learning, Mobile Programming in Kotlin, Game Frameworks, Agile Management for Multiplatform Projects.

Focus: building a Multiplatform Project consisting of a Windows PC Game connected to a mobile app in Android through an SQL Database.

EXTRA-CURRICULARS

Local Tour Guide: Running and managing my own tours. Proven my **conflict-management** and excellent **communication** skills with an average of 5 stars/5 on [GuruWalk](#) while crafting quality experiences for the tourists.

Sports: Developed **leadership skills** as a captain of the football 7v7 team and the volleyball mix team at my University.

Facilitation Trainings: Demonstrated **workshop facilitation skills** in Erasmus+ projects involving Sustainability and Non-Formal Learning. Proven abilities to lead workshops, present complex ideas, and train cross-functional teams in non-formal education settings.
