Location: Timisoara, Romania (available for relocation)

ABOUT ME

Ambitious and tech-enthusiast Business Analyst with a Master's in Computer Science. Proficient in Python and SQL for data-driven problem-solving, I enjoy taking full ownership of projects from conceptualisation to implementation. I'm recognised for strategic and creative thinking, with a passion for driving digital innovation within international teams.

WORK EXPERIENCE

ING Nederland B.V.

Amsterdam, Netherlands

AI Engineer Intern

Apr 2024 - Nov 2024

- Performed Exploratory Data Analysis (EDA) on ING's credit risk datasets using **Python** and **SQL**, identifying key anomalies that improved reporting accuracy.
- Designed and trained two Machine Learning models (Isolation Forest, Autoencoder) to detect critical data inconsistencies.
- Delivered a Proof of Concept (PoC) for data quality automation, reducing the management's decision-making process and the detection time to **less than 1 minute**, while enhancing the process's **accuracy**.
- Translated technical insights into actionable business recommendations for senior stakeholders (CIO level) by presenting the project's impact for ING, strengthening **analytical** and communication skills across technical teams.

Victory Square Partners

Timisoara, Romania

Android Developer Intern

Jul 2021 - Sept 2021

- Supported Agile Scrum sprints, contributing to scalable mobile application development using MVVM architecture.
- Improved UI/UX across 50% of the app's key screens, enhancing user satisfaction and engagement.
- Implemented Firebase Analytics for data-driven feature optimisation and decision-making.
- Collaborated cross-functionally to align design, product, and technical priorities under tight deadlines, gaining a strong understanding of iterative development and stakeholder communication in a **product-oriented environment**.

REMARKABLE PROJECTS

Trip Palette AI (Startup Project)

Enschede, Netherlands

Product Strategist

May 2025 - ongoing

- Defined **product vision** and managed the development process of the AI-driven travel planning web app, resulting in a fully defined MVP.
- Led **requirements analysis**, applied MoSCoW prioritisation, and **mapped business processes** using BPMN 2.0 on **Lucid platform**.
- Managed and mediated a **cross-functional team** (technical/non-technical), acting as an informal **Scrum Master** and ensuring alignment of the product vision.
- Developed a decoupled architecture, implementing the Front-End in React and the Back-End with Java Spring Boot and **PostgreSQL**, demonstrating an understanding of system integration requirements.

- Gained practical experience in **process improvement** and **stakeholder collaboration** within financial institutions by partnering in a 4-person team to improve code review efficiency for ING via AI automation.
- Designed **Azure DevOps** pipelines and managed task tracking to ensure transparency and workflow optimisation.
- Integrated an AI-based (LLM) component using Python for ING's platform, validating feasibility for enterprise use by **facilitating** weekly stakeholder meetings.
- Successfully **automated** a manual process with a consistent feedback loop (execution time under 1 minute), eliminating human inconsistency and accelerating the developer workflow.

SKILLS

Business Analysis & Product: Requirements Analysis & Prioritization (MoSCoW), Process Modeling (BPMN 2.0), User Story Mapping, MVP Definition, Benefits Analysis.

Technical Stack & Tools: **Back-End:** Java (Spring Boot), Python, SQL (PostgreSQL). **Front-End:** React.js, JavaScript, HTML, CSS. **Tools:** Azure DevOps (Boards, Pipelines), GIT, Firebase, Figma, Lucidchart.

Data & Automation: Data Analysis (EDA), Machine Learning (LLMs, Anomaly Detection), Process Automation, Proof-of-Concept Development.

Soft Skills & Leadership: Stakeholder Management, Conflict Resolution, Cross-Functional Team Mediation, Communicative (C1 English), Critical Thinking, Fast Learning, Resilience.

EDUCATION

Master's in Computer Science

University of Twente

Enschede, Netherlands

Graduated in March 2025

Courses: Software Engineering Techniques, Software Management, Requirement Elicitation, Software Architecture, Microservices Architecture in Web Development, Machine Learning, Exploratory Data Analysis.

Bachelor's in Computer Science

West University of Timisoara

Timisoara, Romania

2019–2022

Courses: Algorithms and Data Structures, Introduction to Python, Software Engineering, Practice Stage, Statistics and Numerical Analysis, Web Technologies, Artificial Intelligence, Object-Oriented Programming

Erasmus+ Semester – Bachelor of Game and Apps Development

IADe Creative University

Lisbon, Portugal

2020–2021

Courses: Collaborative Learning, Mobile Programming in Kotlin, Game Frameworks, Agile Management for Multiplatform Projects.

Focus: building a Multiplatform Project consisting of a Windows 2D Game in Unity connected to a Companion App in Android through an SQL Database.

EXTRA-CURRICULARS

Local Tour Guide: Running and managing my own tours. Proven my **conflict-management** and excellent **communication** skills with an average of 5 stars/5 on [GuruWalk](#) while crafting quality experiences for the tourists.

Sports: Developed **leadership skills** as a captain of the football 7v7 team and the volleyball mix team from my University.

Facilitation Trainings: Gained **workshop facilitation skills** in Erasmus+ projects involving Sustainability (YouRoTrip Vienna 2022), Non-Formal Learning (GeoFun Latvia 2022), and Empowering Trainers in Non-Formal Education (Varna 2025). Demonstrated abilities to lead workshops, present complex ideas, and train cross-functional teams in non-formal education settings.
